IBNU ADAM MAULANA

+62-895-3579-41824 | ibnuadam8493@gmail.com | https://www.linkedin.com/in/ibnuadamn/
Depok, West Java, Indonesia

Certified GIS Specialist (BNSP Level 4) and Geography Graduate (GPA 3.71/4.00) with proven expertise in spatial database auditing, land legality (HGU/Cadastral), WebGIS development, and GIS process automation. Experienced in executing end-to-end spatial QA/QC across 9 plantation subsidiaries, processing drone (VTOL) imagery for automated tree counting, and building custom WebGIS workflows for automated land compensation checks. Adept at leveraging Generative AI and open-source geospatial tools (QGIS, ArcGIS Pro, Python, PostGIS, Leaflet.js) to transform complex spatial data into reliable operational intelligence.

Professional Experience

Gunas Group - **Jakarta, Indonesia** Jan 2026 - Present

GIS Specialist & Internal GIS Auditor

Oil Palm Plantation Company

- Geodatabase Auditing & Topology QC: Executed comprehensive spatial data audits across 9 plantation subsidiaries in Sekadau, West Kalimantan. Resolved topology errors, boundary overlaps, and attribute inconsistencies across planting blocks, land compensation (ganti rugi), and smallholder (plasma) layers.
- Land Legality & Cadastral Mapping: Prepared official cadastral maps and HGU (Hak Guna Usaha) boundary mapping to strengthen legal tenure and ensure alignment between field spatial data and government licensing documents.
- WebGIS Development & Process Automation: Developed an interactive company WebGIS application and built an automated spatial suitablity workflow for land compensation processing, enabling real-time suitability checks upon data input to streamline management decisions.
- UAV Mapping & Advanced Tree Counting: Executed high-precision drone (VTOL) aerial surveys and conducted automated tree counting analysis to deliver accurate stand density metrics for operational yield forecasting and management strategy.
- Environmental & Conservation Analytics: Performed spatial proximity analysis for riparian buffer zones (sempadan sungai) and developed regional hotspot distribution maps across Kalimantan for proactive fire monitoring and disaster mitigation.
- Strategic Map Production: Produced executive-level thematic and analytical maps (Land Tenure, Planting Progress, Block Boundaries, Risk Zones) to support C-level strategic decision-making.
- GIS Governance & SOP Standardization: Formulated and standardized GIS SOPs across all 9 regional plantation units to streamline spatial data workflows, ensure QA/QC compliance, and improve inter-departmental coordination with the Head Office.

Neomapper - **Jakarta, Indonesia** Feb 2026 - Present

Carthographer & Content Creator

Survey, Mapping

- End-to-End Content Strategy & Production: Spearheaded end-to-end content production—from ideation and technical copywriting to visual design—delivering high-performing educational geospatial content across digital platforms (e.g., LinkedIn).
- Product Showcase Cartography: Designed professional thematic maps and spatial data visualizations using QGIS and ArcGIS Pro to serve as product showcases and portfolio exemplars for Neomapper’s mapping services.
- AI-Assisted Content Creation: Leveraged Generative AI tools to optimize research, scriptwriting, and visual content generation, significantly accelerating production timelines.
- Content Automation Workflow: Engineered an automated content creation pipeline to streamline daily publishing schedules, increasing posting consistency and operational efficiency.
- Brand Positioning & Analytics: Monitored engagement metrics and content calendars to align educational posts with Neomapper's core product offerings and market positioning.

PT. Geospatial InfoDinamika - **Jakarta, Indonesia** Dec 2025

GIS Surveyor

Survey, Mapping, UAV Services, and Environment

- Executed field data collection for an emission inventory project at TPST Bantargebang and TPA Sumurbatu under the Bekasi City Environmental Agency, successfully gathering data from 100 waste truck drivers at each site.

LabSosio UI - **Depok, Indonesia** Sep 2025 - Dec 2025

Enumerator

Research Institution

- Conducted quantitative data collection for a public space mapping project across DKI Jakarta, specifically responsible for survey activities in Kalideres District, West Jakarta, successfully collecting 30 data samples.

PT. Karya Usaha Abadi - **Jakarta, Indonesia** Jan 2024 - Mar 2026

GIS Surveyor

Professional Services

- Conducted extensive GIS-based building surveys for major regional drinking water companies, including PT. PITS (South Tangerang),

PAM Jaya (Jakarta), PDAM Tirta Benteng (Tangerang City), and PDAM Gapura Tirta Rahayu (Purwakarta).

- Ensured 100% data accuracy and successfully passed strict quality control (QC) standards for over 32,000 surveyed residential and commercial buildings.
- Executed Real Demand Surveys independently to support critical Drinking Water Supply System (SPAM) planning in Bogor Regency and Tangerang City, consistently achieving a 100% inspection pass rate daily.

Badan Informasi Geospasial - **Cibinong, Bogor** Feb 2023 - Jun 2023

GIS Officer Internship

Government

- Created flood disaster modeling using GIS software (HEC-RAS)
- Successfully collected data on flash flood disasters in West Java in 2017-2023.

Education

Universitas Negeri Jakarta - **Jakarta** Sep 2020 - Sep 2024

Bachelor of Geography, 3.71/4.00

- Undergraduate Thesis: "Analysis of Settlement Distribution in Various Disaster-Prone Zones of Semeru Volcano in Pronojiwo District, Lumajang Regency" (Grade: A- / 3.70). Applied spatial overlay and buffer modeling to assess community vulnerability in high-risk volcanic hazard zones.
- Fuel Depot Buffer Zone Identification: Assisted faculty research in identifying spatial safety buffer zones around the Plumpang Fuel Depot using high-resolution Remote Sensing and GIS proximity analysis.
- Land Use Change & Subsidence Monitoring: Executed multi-temporal Landsat 8 image processing to track agricultural land conversion and rice field reduction in Tangerang Regency, supporting land subsidence and urbanization studies.
- Regional Land Cover Dynamics: Contributed to regional spatial analysis monitoring land use/land cover (LULC) changes across the Greater Jakarta (Jabodetabek) metropolitan area.

Organisational Experience

Badan Eksekutif Mahasiswa (BEM) Geography - **Jakarta, Indonesia** Feb 2022 - Feb 2023

Chairman

Student Organizations

- Initiated and established the first Geography Student Executive Board (BEM) as a founding leader in a newly formed program
- Led a team to successfully execute key programs, including a national seminar, new student orientation programs, and the inaugural Geography Festival
- Developed organizational structure and fostered collaboration to build a strong foundation for future leadership and activities.

Skills, Achievements & Other Experience

- **Hard Skills**: ArcGIS, QGIS, Mapinfo, Geolibre, Global Mapper, Drone, Google Suites, Microsoft Office, Canva.
- **Soft Skills**: Leadership, Problem-Solving, Adaptability, Strong Work Ethic, and Communication Skills
- **Achievements**: Primary Operator of Geographic Information Systems Level 4
